The cited prior art, individually or in combination, does not disclose or suggest all the claimed elements in the present application wherein, amongst other limitations, "forming a first gate region at the bottom of said gate trench, said first gate region continuous in a lateral direction parallel to said surface, implanting a buffer region beneath said first gate region, and implanting a second gate region beneath said buffer region, wherein said second gate region is formed entirely beneath said first gate region, and wherein, at a conclusion of implanting said second gate region, said second gate region is continuous in said lateral direction and is narrower than said first gate region", as in the context of claim 15 and "forming a first gate region at the bottom of said gate trench, implanting a buffer region beneath said first gate region, and implanting a second gate region beneath said buffer region, wherein said second gate region is formed entirely beneath said first gate region, wherein said first gate region and said second gate region together form said dual gate structure", as in the context of claims 21, 26, and 30.

Claims 16-20, 22-25, 27-29 and 31-34 also allowed as being directly or indirectly dependent of the allowed independent base claims.
